MODEL: 4852-WG / 4853-WG
Soaker Hose (7.5m & 15m)

HOSELINK[®]

Kit Contents

- 1 x 7.5m or 15m Soaker Hose
- 1 x Hoselink Accessory Connector

The Hoselink Soaker Hose is perfect for watering areas up to 4 metres wide (2 metres either side). Small holes are featured across the length of the hose to ensure even watering and coverage.

Using the Soaker Hose

1 Position hose

Lay the soaker hose along the desired section of your garden.

2 Connect

Connect your Hoselink Accessory Connector to the black cap at the end of the Soaker Hose.

3 Connect hose

Using the Accessory Connector, you can then connect to your Hoselink-fitted Hose.

NOTE 1 Use the Soaker Hose as a sprinkler by laying the hose with the holes facing upwards, or you can deep water by facing the jets towards the ground.

Extending Hose Length

For greater length, you can connect two soaker hoses together. Cleverly designed with an internal thread at one end and an external thread on the other, simply remove the Hoselink Accessory Connector and stop cap from one of the hoses, then connect it to your second hose.

NOTE 2 Please note, we advise connecting no more than two 15m soaker hoses together to prevent water pressure issues from occurring.
