MODEL: 5567
Brass Spray Nozzle

HOSELINK[®]

Kit Contents

1 x Brass Spray Nozzle

Ranging in force from light mist to hard jet spray, the durable Brass Spray Nozzle is the perfect partner for effective watering. The strength of the water flow can also be adjusted with a simple twist of the nozzle.

Troubleshooting

Leaking internally

There are two O-rings located on the internal bar. If damaged or if leaking occurs, remove and replace the O-rings.

Nozzle sticking/stiff to turn

Remove the internal bar and apply some silicone-based lubricant to the O-rings.

Cleaning & Maintenance

Continue to twist the nozzle in an anti-clockwise direction until the internal bar can be removed. This allows you to clean and remove any debris that might be caught inside the nozzle. Should you need to replace the O-rings on the internal bar, you can also purchase these from Hoselink.

Note: This product does not come with a Hoselink Fitting, therefore we recommend you purchase either a Hoselink Accessory Connector or Accessory Connector with Swivel if you already have Hoselink fittings on your hose. If you're new to Hoselink, we recommend purchasing a Starter Kit, which will come complete with all the fittings you need for your hose.

Replacement Parts

O-rings

Please contact Hoselink Customer Care team directly to arrange replacement parts.
