## Kit Contents

---

- 1 x Small Table Lantern
- 1 x USB cable

Elevate your space with timeless elegance. This stylish and versatile lighting solution is designed to complement your space while providing brilliant, touch-activated illumination.

## Lighting Modes

---

The lights feature 8 modes:

- 1: Warm Dim Light – A dim light is displayed continuously from dusk until dawn.
- 2 Cool Dim Light – A cool Dim light is displayed continuously from dusk until dawn.
- 3 Cool Bright Light – A cool bright light is displayed continuously from dusk until dawn

## Activate Light

---

Press the black 'Power' button located on the base, just under the light to turn the light on. Once on, press the black button to cycle through each lighting mode until you reach your preferred option.

**Note:** Unlike many other solar lights, this light does not automatically turn on at dusk and off at dawn. It needs to be manually switched on at the power button, allowing you to control the function and ability to use it even in brightly lit areas.

## Using the Light

---

Either use the handle to hang the light or place it in the desired location. Solar lights need access to direct sunlight for optimum results, preferably 6-8 hours per day. Be sure to clean the solar panel periodically to maintain optimal performance.

## Storing the Lights

---

Manually switch the power to OFF. This will preserve the battery and prevent it from fully discharging during extended storage.

## Specifications

---

Material	PC + ABS
Solar Panel	Monocrystalline
Lithium battery	3.7v 4800mAh
Operating time	Warm Dim: 60 - 70 hours Cool Dim: 15 - 17 hours Cool Bright: 5 – 6 hours
Charge time	8 – 12 hours
Light temperature (Kelvins)	Warm: 3000K Col: 6500K
Number of LEDs	18 LED

**WARNING: DO NOT USE THIS LIGHT UNDERWATER  
OR IN LOW-LYING PUDDLES**
