MODEL: 5563-WG  
Super Jet Washer

**HOSELINK**<sup>®</sup>

## Kit Contents

---

- 1 x Handle
- 1 x Wand
- 1 x Hoselink Accessory Connector
- 1 x Fan Nozzle
- 1 x Jet Nozzle

The Super Jet Washer increases the velocity of the water from your garden tap to produce a fine hard spray that makes easy work of cleaning away stains, dirt and mud. Easily clean cars, boats, wheel arches, windows, outdoor furniture, guttering and more.

## Assembly Instructions

---

### STEP 1 Attach wand to handle

Screw the wand into the top of the handle.

### STEP 2 Attach Accessory Connector to handle

Screw the Accessory Connector into the base of the handle.

### STEP 3 Attach to hose

Attach to your Hoselink-fitted hose using a point and twist motion.

## Using the Super Jet Washer

---

There are two interchangeable brass spray heads included with the Super Jet Washer.

- Fan Nozzle
- Jet Nozzle

Switching between spray nozzles is a simple process of unscrewing the brass tip from the end of the wand and replacing it with the alternate spray nozzle, which is screwed securely to the handle of the wand for safekeeping.

Water flow is easily controlled via the lever and can either be turned on or off or increased/decreased as needed.

**NOTE** As the Super Jet Washer relies on water pressure for effective use, low water pressure will affect the performance of this product. Water tanks are unlikely to produce enough water pressure unless they are fitted with a pump.

## Storage and Maintenance

---

We recommend storing the Super Jet Washer in the garage or shed when not in use. This will prolong the life of the rubber grip on the handle and prevent salt from affecting the spray heads in coastal conditions.
